

CNA101 Introduction To Real Estate Appraising

Text - 1.1 Principles of Residential Real Estate Appraising

This correspondence course provides a comprehensive introduction to the valuation of real property. Valuation theory related to both residential and commercial property is covered, as well as the practical applications of all factors affecting value and real property valuation. The appraisal process is presented in detail with class members solving valuation problems using a student manual or work book. Students must pass an examination to receive a certificate of completion.

This course is also available by distance learning.
